Professional Summary

Technical Lead / Head of Development and Senior Full Stack Developer with 15+ years of experience in software engineering, combining hands-on development with technical leadership, delivery coordination, team organization, production support, and process improvement.

Most recently led a small technical team across technical decisions, task organization, code review, QA coordination, releases, production troubleshooting, and day-to-day engineering delivery. Hands-on experience includes JavaScript, TypeScript, Angular, .NET, C#, Node.js, SQL Server, Azure Functions, Azure DevOps, and Elastic/Kibana.

Experienced in improving engineering workflows, reducing ambiguity, supporting safer releases, investigating complex production issues, and coordinating work across development, QA, DevOps, and stakeholders.

Career focus is increasingly oriented toward engineering leadership, team coordination, delivery ownership, technical strategy, and process improvement, while maintaining strong technical depth to support engineering teams and complex technical decisions.

Core Skills

Engineering Leadership & Delivery: Technical leadership, team coordination, delivery ownership, code review, technical planning and task breakdown, technical decision-making, Kanban workflows, QA collaboration, release coordination, stakeholder communication, process improvement, and production support.

Engineering & Architecture: C#, .NET, JavaScript, TypeScript, Angular, Node.js, SQL Server, REST APIs, Azure Functions, SOLID principles, separation of concerns, Dependency Injection / IoC, async / await, and Task-based programming.

Production & Reliability: Production troubleshooting, Elastic/Kibana, Azure DevOps, CI/CD, log analysis, observability, release validation, gradual rollouts, and production debugging.

Engineering Practices: Maintainability, pull request review, technical investigation, task definition, QA handoff, incremental delivery, legacy system maintenance, and technical documentation.

AI-Assisted Engineering: AI coding agents, structured prompting, technical investigation, task decomposition, code review, documentation, and implementation planning.

Professional Experience

Premium Programmatic — Technical Lead / Head of Development

April 2019 – August 2026 | Remote, Brazil

Led technical direction and engineering delivery while remaining hands-on across application development, architecture, production support, and release execution.

- Led a small engineering team including development, QA, and DevOps, coordinating day-to-day delivery and helping remove technical and operational blockers.
- Coordinated engineering delivery across task definition, implementation, pull request review, QA validation, release preparation, deployment, and production monitoring.
- Defined and improved Kanban-based engineering workflows to increase task visibility, QA handoff quality, release organization, and team alignment.
- Reviewed pull requests and provided technical direction with emphasis on maintainability, architecture, production impact, and incremental delivery.
- Worked with stakeholders and the technical team to clarify requirements, break down complex problems, and turn ambiguous requests into actionable engineering work.
- Coordinated release routines and promoted safer deployment practices through staged validation, monitoring, and post-release troubleshooting.
- Investigated complex production issues using Elastic/Kibana, Azure DevOps, application logs, browser tooling, and runtime analysis.
- Established and improved engineering practices around task definition, code review, QA collaboration, production support, release management, and technical documentation.
- Remained hands-on with Angular, .NET, C#, Node.js, JavaScript, TypeScript, SQL Server, Azure Functions, REST APIs, and internal systems.

Technologies: C#, .NET, ASP.NET, Angular, TypeScript, JavaScript, Node.js, SQL Server, Azure Functions, Azure DevOps, Elastic/Kibana, REST APIs, CI/CD, Bitbucket, Jira.

XL Solutions — Web Developer

May 2017 – April 2019 | Maringá, Brazil

Developed and maintained web and mobile applications for third-party clients using React Native, Node.js, AngularJS, and TypeScript. Worked on application maintenance, feature development, bug fixes, and client-facing solutions.

USES SaaS — Web Developer

October 2015 – December 2016 | Maringá, Brazil

Developed web applications for small and mid-sized clients using AngularJS, Angular Material, Laravel, JavaScript, HTML, and CSS. Worked on frontend implementation, backend support, maintenance, and client-oriented solutions.

UOL BoaCompra — Analyst PHP Programmer

November 2013 – October 2015 | Maringá, Brazil

Worked on web application features related to financial systems and internal operations in a larger engineering environment using Scrum/Kanban, Jira, Jenkins, Confluence, TDD, QUnit, and pair programming.

Gained experience with collaborative engineering practices, testing, structured delivery, and production-oriented systems.

Earlier Experience — Web Developer / Junior Web Developer

FTI Tecnologia da Informação, O Diário, Vivaweb Internet, RedFeet, aiqfome.com, Itecnetwork | 2008 – 2013

Built and maintained websites, ecommerce projects, classifieds platforms, administration systems, client web applications, and internal systems using PHP, C#, ASP.NET, Magento, Zend Framework, JavaScript, jQuery, HTML, and CSS.

Education

Pontifícia Universidade Católica do Rio Grande do Sul

Postgraduate Degree — MBA in Leadership, Team Management and Productivity
2023 – 2024

Unicesumar — Centro Universitário Cesumar

Internet Systems Programming — Information Technology
2007 – 2010

Languages

Portuguese — Native

English — B2 Upper Intermediate (EF SET, 53/100), cert.efset.org/kq8FRZ
