Professional Summary

Technical Lead and Senior Full Stack Developer with 15+ years of experience in software development, combining hands-on engineering with technical leadership, delivery coordination, production support, and process improvement.

Currently support a small technical team across task organization, technical decisions, code review, QA validation, release coordination, production troubleshooting, and day-to-day delivery. I remain hands-on with JavaScript, TypeScript, Angular, .NET, C#, Node.js, SQL Server, Azure Functions, Azure DevOps, and Elastic/Kibana.

Practical and delivery-focused, with experience improving development workflows, reducing ambiguity, supporting safer releases, investigating complex production issues, and helping technical work move effectively from development through QA and production.

My career direction is focused on gradually increasing responsibility for technical leadership, team coordination, delivery ownership, and engineering processes while continuing to use my technical background to support teams and technical decisions.

Core Skills

Technical Leadership & Delivery: Technical leadership, team support, code review, task refinement, technical decision support, Jira/Kanban workflow, delivery coordination, QA collaboration, release organization, stakeholder communication, and process improvement.

Engineering & Architecture: C#, .NET, JavaScript, TypeScript, Angular, Node.js, SQL Server, REST APIs, Azure Functions, SOLID principles, separation of concerns, Dependency Injection / IoC, async / await, and Task-based programming.

Production & Reliability: Production troubleshooting, Elastic/Kibana, Azure DevOps, CI/CD, log analysis, observability, release validation, gradual rollouts, and production debugging.

Engineering Practices: Maintainability, pull request review, technical investigation, task definition, QA handoff, incremental delivery, legacy system maintenance, and technical documentation.

AI-Assisted Workflows: Practical use of AI coding agents and structured prompts to support technical investigation, task breakdown, documentation, code review, implementation planning, and safer incremental changes.

Professional Experience

Premium Programmatic — Technical Lead

April 2019 – Present | Brazil

Technical Lead working across team support, delivery organization, code quality, production troubleshooting, release routines, technical decisions, and hands-on development.

- Lead and support a small technical team composed of 1 developer, 1 QA professional, and 1 DevOps professional, helping coordinate day-to-day work and remove technical or delivery blockers.
- Organize the development flow across task definition, implementation, pull request review, QA validation, release preparation, deployment, and production monitoring.
- Created and maintain a Kanban-based workflow to improve task visibility, delivery tracking, QA handoff, release organization, and team alignment.
- Review pull requests and provide technical guidance with attention to maintainability, existing architecture, potential side effects, and production impact.
- Help clarify requirements and technical problems before implementation, reducing ambiguity and making tasks easier for development and QA to execute.
- Coordinate weekly release routines and support risk-aware practices such as gradual rollouts, validation, monitoring, and post-release troubleshooting.
- Investigate production issues using Elastic/Kibana, Azure DevOps, application logs, browser tools, and runtime analysis, working with development, QA, and DevOps to identify root causes.
- Help define and improve engineering practices related to task creation, code review, QA handoff, production support, release organization, and technical documentation.
- Remain hands-on with Angular, .NET, C#, Node.js, JavaScript, TypeScript, SQL Server, Azure Functions, APIs, and internal dashboards.
- Apply practical engineering practices including SOLID principles, separation of concerns, Dependency Injection / IoC, async / await, Task-based programming, and established architectural patterns when working on .NET applications.

Technologies: C#, .NET, ASP.NET, Angular, TypeScript, JavaScript, Node.js, SQL Server, Azure Functions, Azure DevOps, Elastic/Kibana, REST APIs, Dependency Injection / IoC, async / await, CI/CD, Bitbucket, Jira.

XL Solutions — Web Developer

May 2017 – April 2019 | Maringá, Brazil

Developed and maintained web and mobile applications for third-party clients using React Native, Node.js, AngularJS, and TypeScript. Worked on application maintenance, feature development, bug fixes, and client-facing solutions.

USES SaaS — Web Developer

October 2015 – December 2016 | Maringá, Brazil

Developed web applications for small and mid-sized clients using AngularJS, Angular Material, Laravel, JavaScript, HTML, and CSS. Worked on frontend implementation, backend support, maintenance, and client-oriented solutions.

UOL BoaCompra — Analyst PHP Programmer

November 2013 – October 2015 | Maringá, Brazil

Worked on web application features related to financial systems and internal operations in a larger engineering environment using Scrum/Kanban, Jira, Jenkins, Confluence, TDD, QUnit, and pair programming.

Gained experience with collaborative engineering practices, testing, structured delivery, and production-oriented systems.

Earlier Experience — Web Developer / Junior Web Developer

FTI Tecnologia da Informação, O Diário, Vivaweb Internet, RedFeet, aiqfome.com, Itecnetwork | 2008 – 2013

Built and maintained websites, ecommerce projects, classifieds platforms, administration systems, client web applications, and internal systems using PHP, C#, ASP.NET, Magento, Zend Framework, JavaScript, jQuery, HTML, and CSS.

Education

Pontifícia Universidade Católica do Rio Grande do Sul

Postgraduate Degree — MBA in Leadership, Team Management and Productivity
2023 – 2024

Unicesumar — Centro Universitário Cesumar

Internet Systems Programming — Information Technology
2007 – 2010

Languages

Portuguese — Native

English — B2 Upper Intermediate (EF SET, 53/100), cert.efset.org/kq8FRZ
