Professional Summary

Technical Lead and Senior Full Stack Developer with 15+ years of experience building, maintaining, and supporting web applications, internal platforms, and advertising technology systems.

Currently working in a mixed role that includes technical leadership, delivery coordination, code review, production troubleshooting, release support, QA support, and hands-on full stack development with JavaScript, TypeScript, Angular, .NET, Node.js, SQL Server, Azure DevOps, Elastic/Kibana, Bitbucket, and Jira.

Practical and delivery-focused, with experience helping small technical teams organize work, improve development practices, support safer releases, and investigate production issues. Long-term career direction focused on moving gradually toward more leadership, team coordination, delivery ownership, and process improvement, with less day-to-day coding over time.

Core Skills

Leadership & Delivery: Technical leadership, code review, task refinement, Jira/Kanban workflow, delivery coordination, QA support, release organization, technical documentation, stakeholder communication, production support, and process improvement.

Full Stack Development: JavaScript, TypeScript, Angular, AngularJS, HTML, CSS, React Native, .NET, ASP.NET, Node.js, PHP, Laravel, and SQL Server.

Production Support & Observability: Azure DevOps, CI/CD, Elastic/Kibana, Jenkins, Git, Bitbucket, troubleshooting, release support, log analysis, and application behavior investigation.

AI-Assisted Workflows: Practical use of AI coding agents and structured prompts to support technical investigation, task breakdown, documentation, code review, and safer incremental changes.

AdTech Exposure: Practical experience with advertising technology systems, JavaScript ad tags, publisher integrations, third-party website scripts, ad delivery troubleshooting, production debugging, and exposure to Google Publisher Tag, Prebid.js, and Amazon Publisher Services.

Professional Experience

Premium Programmatic — Technical Lead

April 2019 – Present | Brazil

Technical Lead working across delivery organization, code quality, production support, release routines, and hands-on implementation for internal and client-facing advertising technology systems.

- Lead and support a small technical team composed of 1 developer, 1 QA professional, and 1 DevOps professional.
- Maintain and evolve multiple products, including a JavaScript Tags platform, Azure Functions jobs, and Angular-based dashboard applications.
- Created and maintain a Kanban-based workflow to improve task visibility, delivery tracking, QA handoff, and day-to-day organization.
- Help define and improve development practices for task creation, pull request review, QA validation, release organization, and production support.
- Coordinate weekly release routines while applying risk-aware deployment practices to reduce production exposure.
- Review pull requests and help keep code aligned with existing project patterns, maintainability expectations, and delivery needs.
- Support production troubleshooting using Elastic/Kibana logs, Azure DevOps pipelines, and application behavior analysis.
- Help improve production visibility through the use of Elastic-based monitoring and log analysis.
- Develop and maintain full stack features, API integrations, internal dashboards, Azure Functions routines, and JavaScript logic executed on third-party publisher websites.
- Work hands-on with Angular, .NET, Node.js, JavaScript, TypeScript, SQL Server, Azure DevOps, Elastic/Kibana, Bitbucket, and Jira.

XL Solutions — Web Developer

May 2017 – April 2019 | Maringá, Brazil

Developed and maintained web and mobile applications for third-party clients using React Native, Node.js, AngularJS, and TypeScript.

Worked on application maintenance, feature development, bug fixes, and client-facing web and mobile solutions.

USES SaaS — Web Developer

October 2015 – December 2016 | Maringá, Brazil

Developed websites and web application interfaces for small and mid-sized clients using AngularJS, Angular Material, Laravel, JavaScript, HTML, and CSS.

Worked on frontend implementation, backend support, maintenance tasks, and client-oriented web applications.

UOL BoaCompra — Analyst PHP Programmer

November 2013 – October 2015 | Maringá, Brazil

Worked on web application features related to financial systems and internal operations in a larger engineering environment using Scrum/Kanban, Jira, Jenkins, Confluence, TDD, QUnit, and pair programming.

Gained experience with collaborative engineering practices, testing culture, structured delivery, and production-oriented systems.

Earlier Experience — Web Developer / Junior Web Developer

FTI Tecnologia da Informação, O Diário, Vivaweb Internet, RedFeet, aiqfome.com, Itecnetwork | 2008 – 2013

Built and maintained websites, ecommerce projects, classifieds platforms, admin systems, client web applications, and internal systems using PHP, C#, ASP.NET, Magento, Zend Framework, JavaScript, jQuery, HTML, and CSS.
